

GVC3202

SIP/Android Video Conferencing Solution

The GVC3202 is a ground-breaking solution that offers businesses a revolutionary video conferencing system with unprecedented flexibility and the power of support for multiple popular video conferencing protocols and platforms right out of the box. The SIP-based GVC3202 supports Grandstream's robust IPVideoTalk Pro platform for plug and play video conferencing while also being interoperable with any 3rd party SIP video conferencing platform - thus offering a great option to expand or implement a 3rd party platform. Additionally, since it is based on Android 4.4, the GVC3202 offers full access to all video conferencing apps in the Google Play Store. In comparison to Grandstream's GVC3200, the GVC3202 offers a slightly lower capacity option for businesses looking for up to 3-way video-conferencing and support for up to 2 Full HD monitors. The GVC3202 sports an innovative, patent-pending embedded MCU that supports up to 3-way conferencing with local mixing between SIP and other protocols.

Supports any SIP platform and any Android app - and can bridge calls from Android apps into SIP conference

Built-in Bluetooth for use with Bluetooth speakers/microphones, keyboards, data exchange, etc.

Support for 2 screens thanks to 2 HDMI outputs

Experience the fastest possible connections speeds to maximize video quality

Experience video resolutions up to 1080p

A powerful 9x optical zoom offers robust video clarity

Share a presentation with conference attendees or review a document.

Embedded MCU to allow up to 3 video attendees

Local & far-end controllable PTZ camera with wide-angle lens

The GVC3202 can remind attendees 10 mn before start-time and automatically call all participants

Easily record all video conferences to document meetings
